THE NORDIC WAY

**FINNAIR**

# THE NORDIC WAY

HERE IN THE NORDICS, WE VALUE QUALITY, PUNCTUALITY AND PRECISION. WE SEE TRANSPARENCY AND COLLABORATION AS BASIC TOOLS FOR REVOLUTIONISING THE CARGO INDUSTRY. WE KNOW THAT TO OPTIMISE LOGISTICS IT IS CRITICAL TO HAVE A COMPLETE REAL-TIME VIEW OF OPERATIONS USING THE MOST MODERN TOOLS.

## NORDIC EXPERIENCE

We are true pioneers in the cargo industry. Since 1923 we have been transporting all kinds of air cargo with care and punctuality from our ideal location between West and East. Nowadays we can proudly say that we are one of the oldest cargo companies, and one of the most modern in the world. In fact, we are not just a cargo company, we are reshaping the world of air cargo.

### THE SHORT NORTHERN ROUTE BETWEEN EUROPE AND ASIA

The shortest connections between East and West pass through Helsinki. The short northern route via Helsinki offers your cargo an ideal way to numerous destinations in Europe, major cities in Asia and various destinations in North America. Our geographical location and our new ultra-modern COOL cargo hub makes us the leading airline in the transportation of high-value Norwegian seafood to Asia.

### UNCROWDED HELSINKI AIRPORT

Helsinki Airport is one of the world's most punctual airports and our new temperature-controlled cargo hub is located close to wide-body aircraft stands to reduce transport times and ensure efficiency. This means your cargo remains at the right temperature and in the right condition on its journey through Helsinki. Our COOL Nordic Cargo Hub has dedicated areas for general cargo, perishables and pharma, and temperatures are monitored 24/7 from our COOL Control Center. Our ultra-modern hub is driven by the latest automation technology and is designed and built to be one of the world's greenest air cargo terminals.

### A MODERN FLEET

Our fleet of modern aircraft is fuel-efficient, which helps make air transport more sustainable. Over half of our long-haul fleet are modern Airbus A350s. With truly advanced features like a lightweight material airframe, the latest generation engines, state-of-the-art aerodynamics, and highly integrated systems, the A350 XWBs provide significantly increased cargo capacity and use up to 25% less fuel. As a result, the A350 also produces 25% less CO<sup>2</sup> emissions.
